

**Ferti Sol™** The best line of soluble fertilizers

**Ferti Sol Nitric Acid 55%** it is a fertilizer that provides nitrogen-nitric to your crops in an efficient and available way. It is used to prevent clogging of drippers and to improve the quality of saline water. When it is acidified, the bicarbonates it contains dissolve, improving the absorption of magnesium and calcium.

## GUARANTEED ANALYSIS

| PARAMETER                            | VALUE                    |
|--------------------------------------|--------------------------|
| Concentration (HNO <sub>3</sub> )    | 55.0 %                   |
| Total Nitrogen (N)                   | 13.0 %                   |
| Nitric Nitrogen (N-NO <sub>3</sub> ) | 13.0 %                   |
| Density (30°C)                       | 1.33 g / cm <sup>3</sup> |
| pH                                   | < 1.0                    |
| Appearance                           | Yellowish liquid         |
| Presentation                         | Bulk packaging           |
